Results of Research of 5,000 US Adults Across Eight Separate States Shows Mixed Reactions to Idea of Splitting US Into Multiple Countries:

In eight separate pieces of research, SurveyUSA interviewed 625 adults in each of 8 US states on the topic of splitting the United States into two or more countries based on political divisions.

Research was conducted in six southern states ([Texas](#) , [Alabama](#) , [Mississippi](#) , [Louisiana](#) , [South Carolina](#) , and [Florida](#)), in [New Hampshire](#) , and in [Hawaii](#) . Respondents in the southern states saw state-customized versions of largely the same questionnaire, while Hawaii respondents were shown a number of Hawaii-specific questions and some of the questions from the southern surveys, and New Hampshire respondents received primarily New Hampshire-specific questions combined with a small number of the questions also asked in the South.

Click the links above to view fully crosstabbed results for each state; highlighted top-line results compared from state to state follow:

Majorities in each southern state, in Hawaii, and in New Hampshire say Congress should just let the state go if any of California, Texas, or Hawaii voted to declare its intention to negotiate peacefully with Congress to leave the union. There is relatively little variance across the eight states polled and across the three states being asked about; on average, 57% say the state should be allowed to leave; 37% say economic sanctions should be used; 6% would back a military attack to keep the state in the union.

Respondents in Texas (by 20 points), Louisiana (13 points), Mississippi (11 points), and Hawaii (9 points) would each support the idea of their state holding a vote to find out whether voters want to peacefully separate from the US. Those in Florida (by 11 points), South Carolina (6 points), New Hampshire (5 points), and Alabama (a nominal 2 points) are opposed.

While holding a vote sees some clear support in some states, the idea of actually setting a date to be independent from the US, recruiting other states to join a federation, and peacefully negotiating a withdrawal from the US, even if it is uncertain whether other states would join, is supported only in Texas, and there by a small 7 point margin. The margin of opposition in the south ranges from a low of 4 points in Louisiana to 23 points in Florida, and is 31 points in New Hampshire.

Pluralities in most of the eight states polled (and a majority in New Hampshire) would not donate any volunteer time to political movements working to lead their state out of the union; majorities in most states (and a plurality in Texas) would not donate any money to these efforts.

Pluralities in Mississippi (a 27-point margin), Alabama (22 points), Louisiana (18 points), and Texas (7 points) say they are opposed to the idea of groups of counties or parishes declaring independence from the US on their own.

Along with the preceding questions, SurveyUSA also asked New Hampshire adults a series of questions about the current state of politics in the United States. First, respondents were asked how much they agreed or disagreed with these six statements, ranked here from most combined agreement to least: 91%: People in the United States are growing more divided over important issues, such as LGBT rights, guns, abortion, election integrity, race relations, involvement in foreign wars, climate change, immigration, etc. 89%: If the citizens of the United States continue to get more divided on major issues, I fear that political violence will increase. 79%: The federal government's financial decisions and economic regulations hurt our livelihoods and could lead to inflation and bankruptcy. 65%: Politicians in Washington, DC violate our rights more than they protect our rights. 64%: Laws, regulations, and court rulings coming out of Washington, DC are incompatible with New Hampshire's culture of freedom. 29%: Elected leaders in the Federal Government have my best interests in mind when passing legislation. New Hampshire adults were next asked whether or not the state should be able to ignore federal laws and regulations in eight different areas. Percentage saying they agreed NH should be able to ignore federal laws, ranked from highest to lowest: 55%: Cannabis. 27% disagree. 50%: Abortion. 33% disagree. 46%: Education. 41% disagree. 45%: Firearms. 42% disagree. 42%: Medicine. 37% disagree. 42%: Public health. 42% disagree. 41%: Businesses. 38% disagree. 40% Welfare. 42% disagree. A series of additional statements show some additional elements of independence: 63% agree (22% strongly agree, 41% somewhat agree) that they trust their state government more than they trust the federal government. 24% disagree (17% somewhat disagree, 7% strongly disagree.) 43% agree (20% strongly, 23% somewhat) that states should not need permission from the federal government to peacefully separate it. 45% disagree (16% somewhat, 29% strongly). 39% agree (16% strongly, 23% somewhat) that if New Hampshire were not already part of the US, it would be beneficial for the state to join. 58% disagree (21% somewhat, 37% strongly). 38% agree (11% strongly, 27% somewhat) that the arrangement most likely to provide peace and tranquility in the United States is for individual counties to be allowed to be governed by states that are in line with their values. 31% disagree (16% somewhat, 15% strongly). 29% agree (14% strongly, 15% somewhat) that they would prefer New Hampshire govern itself as an independent country. 58% disagree (21% somewhat, 37% strongly). Full results follow ...

About the Research: SurveyUSA interviewed 625 adults from each of 8 US States online 06/21/22 through 06/30/22, using sample provided by Lucid Holdings LLC of New Orleans. This specific report shows the responses of 625 New Hampshire adults, who were interviewed 06/21/22 through 06/28/22. The pool of adult survey respondents was weighted to US Census targets for gender, age, race, education, and home ownership.

What is the strongest penalty that Congress should impose on the state if someday one of the following states were to vote to declare its intention to:
Negotiate peacefully with Congress to separate from the US
No longer send its elected officials to Congress
Sign treaties to allow the United States to maintain important military bases within the state
First, California?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
